

***RABBITEYE BLUEBERRIES (Zone 7-Wilkes)**

\$10.00 per 1 gallon Container

NOTE: Unless self-fertile is indicated, blueberries require two varieties for cross-pollination.

	Quantity	Total Cost
Columbus: Late season ripening with very vigorous semi-upright to upright growth, large berries with excellent color and flavor.		
Brightwell: Early to mid-season ripening, medium-large berry, has sweet flavor and light blue color. Upright/vigorous growth. A consistent producer.		
Legacy/Northern Highbush Variety: Very productive, mid-late season, Upright growth, mid-to-large light blue fruit. Good fruit size and quality. Does well at higher elevations.		
Southland: Medium to large sized fruit. Medium to late ripening variety. Grows upright with compact dense foliage.		
Climax: Early ripening, produces medium-size berries with sweet flavor. Plants are upright with intense green foliage.		
Ira (self-fertile): Vigorous upright growth, medium size light blue fruit, mid-season to late.		
Onslow (self-fertile): Mid-season ripening, has medium to large berries that are darker blue in color. Highly productive.		
Powder Blue: Late-season ripening, high productive with medium to large sweet fruit, darker in color. Upright plant with good foliage.		
Premier: Early to mid-season, large fruit. Excellent flavor, light blue in color and good quality. Plants are upright with good foliage. Highly productive.		
Tifblue: Mid-season ripening, produces medium to large berries with good color. Plants are semi-upright with moderately vigorous growth.		
Yadkin (self-fertile): Semi-upright moderately vigorous growth, mid-season, mid-to-large fruit with good color.		

MUSCADINE \$10.00 (Bare Root-Not in Container, Approx. 3-4' in length)

	Quantity	Total Cost
Ison: The Ison muscadine vine is a beautiful black variety that is the best self-fertile available. This muscadine contains 19% sugar and has excellent size and production. The Ison muscadine vine produces some of the best wine available because of its taste and flavor.		
Late Fry: The Late Fry muscadine variety is another late season grape that is bronze and self-fertile. It produces delicious fruit that contains 20% sugar. The muscadine fruit is large in size and is very vigorous with high yields. This muscadine variety has a slightly improved flavor over Granny Val but does not produce in as large of clusters as the Granny Val.

STRAWBERRIES \$8.00 per bundle of 25 plants		
	Quantity	Total Cost
Jewel: Is a mid-season June bearing variety. The plants are very productive and the fruit is large with superior shape and flavor.		
AC Wendy: June bearing, a very consistent performer. The berry is wedge-shaped to conic, with firm, bright colored flesh and has an exceptional fresh flavor. A productive variety, Wendy holds its fruit size through the picking season.		
Albion: Everbearing, with high yields of large berries, Albion is fast becoming one of the most popular day-neutral varieties. The fruit are firm with food flavor and red color. The fruit are firm with good flavor and red color.		
	Quantity	Total Cost
GRAPES \$10.00 (Bare Root-Not in Container, Approx. 3-4' in length)		
Concord: Concord Seeded is one of the best known and most widely grown varieties of the bunch grapes. It is a beautiful grape with very large bunches. The fruit is excellent for jelly, jams and preserves as well as fresh juice. You can also just eat them right off the vine. Fruit ripens late September.		
FRUIT TREES \$20.00 (Bare Root-Not in Container, Approx. 4-5' in height) *All fruit trees benefit from cross-pollination. However, a few are capable of self-pollination.		
	Quantity	Total Cost
APPLE TREES		
Honeycrisp: The Honeycrisp apple tree produces fruit that has beautiful red skin over a yellow background. The apple tree has apples that are sweet and mildly tart. The Honeycrisp apple tree is a newer variety and has become a very popular apple at the supermarkets. The apple texture is similar to a watermelon. This apple is fun to eat and ripens late September to late October.		
Fuji: The Fuji Apple tree produces fruit that is medium to large fruit. This is one of the most popular fresh eating apples in the US. The Fuji apple tree variety has a reddish-green color. The apple is firm, crunchy, juicy white flesh with an excellent flavor. The Fuji apple tree produces fruit that also has a good keeping quality. This apple tree variety ripens early to mid-September.		
Gala: The Gala apple tree is a pollinator. This apple trees fruit medium sized with golden-yellow skin and a red-orange blush. The Gala apples flesh is firm, sweet, crisp and juicy. The apple stores very well. The Gala apple ripens late August through early September.		
FIG TREES		
Celeste: The Celeste fig has a very sweet flesh has a rich, honey flavor. This fig tree produces a medium size fig that bears even in unfavorable weather climates. Cold hardy and a very heavy producer.		
PEACH TREES		
Elberta: (self-fertile) Classic, rich peach flavor high scoring in taste tests. Use fresh, canned or cooked.		
Bell of Georgia: (self-fertile) White skin peach with a red overlay of splotching. Delicious firm pulp that is fruity flavored, juicy and sweet.		
PEAR TREES		
Moonglow: The Moonglow pear tree is a pollinator. It is a large pear with brownish-green skin. The Moonglow pear's soft, juicy flesh is nearly free of grit and has a sweet mild flavor. This pear tree ripens early August, 2 weeks prior to Bartlett pear tree.		
Shinko: Shinko Asian pears are larger in size than most Asian pears, round in shape with brown russet skin. The Shinko Asian pear is sweet and juicy with a brandy aroma and a crisp, firm texture.		
CHERRY TREES		
Montmorency: Montmorency Cherry is standard for delicious pies. It is one of the most popular dessert cherries in North America. The fruit is very large and has a bright red color skin. The flesh is very firm and yellow with clear juice. The flavor is tart and tangy. Montmorency is very cold hardy and disease resistant. Tart cherries can pollinate a sweet cherry as long as they bloom at the same time. Grows up 15' and ripens late June. Self-Fertile.		
PLUM TREES		
Santa Rosa: The Santa Rosa plum is a very large Japanese plum. This plum has a purplish-red skin with blue blooms. Santa Rosa plum has firm flesh that is yellow to dark red near skin. It is a rich, pleasing tart flavored plum. The Santa Rosa is self-fertile and ripens in mid-June.
